TECHNISCHE  
UNIVERSITÄT  
DARMSTADT

FB 18

This module manual lists the modules in the Studium Generale area for the following degree programs (Exam regulations 2023):

B.Sc. Electrical Engineering and Information Technology (2023)  
M.Sc. Electrical Engineering and Information Technology (2023)  
B.Sc. Mechatronics (2023)  
M.Sc. Mechatronics (2023)  
B.Sc. Information Systems Technology (2023)  
M.Sc. Information Systems Technology (2023)  
M.Sc. Information and Communication Engineering (2023)  
B.Sc. Biomedical Engineering (2023)

Module handbook: Studium Generale (PO 2023)

Date: 01.03.2024

<b>5 Languages, soft skills</b>	<b>78</b>
5.1 Languages . . . . .	78
5.2 Soft Skills . . . . .	78
Application in Teaching (Tutor Activities) . . . . .	78
<b>6 Insight into professional life</b>	<b>84</b>
Excursion SAE . . . . .	84
Work and Process Organization . . . . .	85
Human Factors/Ergonomics . . . . .	87
Standardization, Testing and Approvals in the Electrotechnical Area . . . . .	89
Patents - How to Protect Technical Inventions . . . . .	91

# 1 Mentoring

Only in the Bachelor's degree programs

<b>Module name</b> Mentoring									
<b>Module nr.</b> 18-dy-1040	<b>Credit points</b> 0 CP	<b>Workload</b> 0 h	<b>Self-study</b> 0 h	<b>Module duration</b> 2 Term	<b>Module cycle</b> Winter term				
<b>Language</b> German				<b>Module owner</b>					
<b>1 Teaching content</b> The following learning content is taught in the Mentoring: <ul style="list-style-type: none"><li>• reflection of own study decision and situation,</li><li>• basics of the working techniques,</li><li>• learning techniques and time management methods.</li></ul> The mentoring consists of student-led tutorials in the scope of normally twelve units consisting of group and one-on-one talks, as well as workshop elements and the simulation of an examination situation. For students without exam success in the first semester (WiSe) in an examination in the field of "fundamentals of electrical engineering and information technology" or "fundamentals of mathematics" of the study and examination plan, the second semester (SoSe) takes place, usually in the scope of three units consisting of one-to-one-talks and workshop elements.									
<b>2 Learning objectives</b>									
<b>3 Recommended prerequisites for participation</b>									
<b>4 Form of examination</b>									
<b>5 Prerequisite for the award of credit points</b> Passing the final module examination									
<b>6 Grading</b>									
<b>7 Usability of the module</b>									
<b>8 Grade bonus compliant to §25 (2)</b>									
<b>9 References</b> <ul style="list-style-type: none"><li>• Kurt Landau, Arbeitstechniken für Studierende der Ingenieurwissenschaften; Verlag ergonomia oHG, Stuttgart, ISBN 3-935089-65-1</li><li>• Kurt Landau, Besser studieren! Übungsbuch zum Werk Arbeitstechniken; Verlag ergonomia oHG, Stuttgart, ISBN 3-935089-67-X</li><li>• all required as well as current materials will be provided in the moodle course</li></ul>

<b>Module name</b> German and International Corporate Law							
<b>Module nr.</b> 01-42-1B01/4	<b>Credit points</b> 4 CP	<b>Workload</b> 120 h	<b>Self-study</b> 75 h	<b>Module duration</b> 1 Term	<b>Module cycle</b> Every Semester		
<b>Language</b> German			<b>Module owner</b> Prof. Dr. jur. Janine Wendt				
<b>1</b>	<b>Teaching content</b> <p>The lecture is divided into two parts: The first part is an introduction to commercial law. The aim is to understand the importance of contract drafting in a company and to take into account the main aspects of commercial law regulations. The second part is devoted to company law, in particular the law of commercial partnerships and corporations. It also deals with the basic issues of good corporate governance and the importance of compliance. European company law will also be introduced.</p> <p>Recitation: This course discusses practical cases concerning commercial law and general company law. In preparation for the exam, sample cases will be discussed.</p>						
<b>2</b>	<b>Learning objectives</b> <p>After the course students are able to</p> <ul style="list-style-type: none"> <li>• recognise the conditions for the application of commercial law.</li> <li>• distinguish between the different commercial intermediaries.</li> <li>• understand the basic structures of the most important forms of partnerships and corporations as legal entities for companies.</li> <li>• understand the importance of good corporate governance and the importance of compliance for companies.</li> <li>• deal with different legal texts.</li> <li>• understand the significance of European legal developments for German law and in particular for the protection of investors.</li> <li>• understand the context of legal regulations (e.g. sales law + commercial law + company law).</li> <li>• work on simple facts of the German commercial and company law, as well as the financial market law by applying a legal approach and to compile answers to simple legal questions independently.</li> <li>• generally recognise, assess and respond to the possibilities and risks of liability in legal matters.</li> </ul>						
<b>3</b>	<b>Recommended prerequisites for participation</b> Prerequisites: none Previous Knowledge: see initial skills and contract law						
<b>4</b>	<b>Form of examination</b> Module exam: <ul style="list-style-type: none"> <li>• Module exam (Technical examination, Written examination, Duration: 90 Min., Default RS)</li> </ul>

<b>Module name</b> Introduction to Business Administration							
<b>Module nr.</b> 01-10-1028/f	<b>Credit points</b> 3 CP	<b>Workload</b> 90 h	<b>Self-study</b> 60 h	<b>Module duration</b> 1 Term	<b>Module cycle</b> Every Semester		
<b>Language</b> German			<b>Module owner</b> Prof. Dr. rer. pol. Dirk Schiereck				
<b>1</b>	<b>Teaching content</b> This course serves as an introduction into studies of business administration for students of other sciences. The course will provide a broad spectrum of knowledge from the "birth" of business administration as an university science field until its fragmentation into many specialized disciplines. Core topics will include basics of business administration (definitions and German legal forms), some Marketing concepts, introduction into Production Management (business process optimization and quality management), basic knowledge of organisational and personnel related topics, fundamental concepts of finance and investment as well as internal and external reporting standards.						
<b>2</b>	<b>Learning objectives</b> The course encourages students who have not been confronted with business studies before to think economically. Furthermore, it should enable students to better understand actions of managers and corporations in general.  After the course students are able to <ul style="list-style-type: none"><li>• comprehend the development in the history of business administration,</li><li>• apply essential marketing concepts,</li><li>• use fundamental methods in production management,</li><li>• economically evaluate investment alternatives and</li><li>• understand important interrelations in financial accounting.</li></ul>						
<b>3</b>	<b>Recommended prerequisites for participation</b> None						
<b>4</b>	<b>Form of examination</b> Module exam: <ul style="list-style-type: none"><li>• Module exam (Technical examination, Examination, Duration: 90 Min., Default RS)</li></ul>						
<b>5</b>	<b>Prerequisite for the award of credit points</b> Passing the examination						
<b>6</b>	<b>Grading</b> Module exam: <ul style="list-style-type: none"><li>• Module exam (Technical examination, Examination, Weighting: 100 %)</li></ul>						
<b>7</b>	<b>Usability of the module</b>

	<b>Course nr.</b> 01-60-0000-vl	<b>Course name</b> Introduction to Economics						
	<b>Instructor</b>			<b>Type</b> Lecture	<b>SWS</b> 2			

<b>Module name</b> HIGHEST lecture series - From the concept to your own company					
<b>Module nr.</b> 01-27-0Z01	<b>Credit points</b> 2 CP	<b>Workload</b> 60 h	<b>Self-study</b> 60 h	<b>Module duration</b> 1 Term	<b>Module cycle</b> Every Semester
<b>Language</b> German			<b>Module owner</b> Prof. Dr. rer. pol. Carolin Bock		
<b>1</b>	<b>Teaching content</b> The HIGHEST lecture series introduces students to the process of founding a startup. The aim of the lecture is to raise students' awareness of startup-related topics and entrepreneurial thinking. Various topics of the multi-layered start-up process are discussed and underpinned by numerous exciting examples from practice. The aim is to convey contents that are helpful for a successful founding process and enable entrepreneurial action.  Exemplary topics are: <ul style="list-style-type: none"> <li>• writing a business plan, financing, grants and funding programs, founder skills, founder teams,</li> <li>• idea generation, innovations, investors, creative techniques, marketing and sales in startups,</li> <li>• ecosystems and networks, legal, social entrepreneurship and more.</li> </ul> Among other things, the lecture series will address these questions: <ul style="list-style-type: none"> <li>• What is innovation, and what are the paths to commercialization?</li> <li>• How does an innovation become a business idea and ultimately a company?</li> <li>• How do I know I'm a founder?</li> <li>• What skills and competencies does a founding team need? Who do I involve and who not?</li> <li>• How do I build a business?</li> <li>• How do I lead a team?</li> <li>• How do I get customers?</li> <li>• How do I do business with other companies?</li> <li>• What (legal) measures are there to protect my idea or research result?</li> <li>• What financing options, funding programs or support services are available?</li> <li>• What should I look out for when approaching financiers and Venture Capitalists?</li> <li>• How do I negotiate conditions skillfully?</li> <li>• What are positive examples, pioneers or unicorns and what can I learn from them?</li> </ul> Numerous speakers will be integrated into the lectures to share their experience and ensure a high level of practical relevance.				
<b>2</b>	<b>Learning objectives</b> Through the course, students are better able to assess their own abilities as founders. Students know the opportunities and challenges of the startup process. Students know the individual steps of a startup process and are supported and motivated to pursue their own startups. Students know the network and environment of the TU Darmstadt and know where they can get which support.				
<b>3</b>	<b>Recommended prerequisites for participation</b> The lecture series is suitable for all students (Bachelor/Master) and does not require any special knowledge.				
<b>4</b>	<b>Form of examination</b> Module exam: <ul style="list-style-type: none"> <li>• Module exam (Study achievement, Oral/written examination, p/np RS)</li> </ul> Supplement to Assessment Methods: Oral/written: Type and duration of exam are announced by the beginning of the course Written: exam (duration 60 - 90 minutes) Oral: team or individual exam (duration 15 - 20 minutes per participant)				
<b>5</b>	<b>Prerequisite for the award of credit points</b> Passing the examination				
<b>6</b>	<b>Grading</b>				

	<p>Module exam:</p> <ul style="list-style-type: none"> <li>• Module exam (Study achievement, Oral/written examination, Weighting: 100 %)</li> </ul>

<b>Module name</b> Introduction to Entrepreneurship						
<b>Module nr.</b> 01-27-1B01	<b>Credit points</b> 3 CP	<b>Workload</b> 90 h	<b>Self-study</b> 45 h	<b>Module duration</b> 1 Term	<b>Module cycle</b> Every Semester	
<b>Language</b> English				<b>Module owner</b> Prof. Dr. rer. pol. Carolin Bock		
<b>1</b>	<b>Teaching content</b> The course "Grundlagen des Entrepreneurship" (Introduction to Entrepreneurship), being part of the module "Grundlagen Entrepreneurship" introduces concepts of entrepreneurship relying on basic concepts and definitions. Hereby, a global and international perspective is taken. The course includes the topics: actions of entrepreneurs, their motivations and idea generating processes, effectuation and causation, their decision-making, and entrepreneurial failure. Concerning entrepreneurial businesses, business planning, growth models, strategic alliances of young ventures, and human and social capital of entrepreneurs are discussed. Further, special types of entrepreneurship are taught. In addition, workshops will give students an insight into practical methods such as design thinking and the implementation and identification of opportunities.					
<b>2</b>	<b>Learning objectives</b> After the course students are able to <ul style="list-style-type: none"> <li>• define and describe basic concepts towards entrepreneurship,</li> <li>• understand the psychologically-related concepts of being an entrepreneur,</li> <li>• understand and describe the evolution from small firms to multinational enterprises,</li> <li>• describe special types of entrepreneurship,</li> <li>• understand basic concepts of entrepreneurial thinking towards idea- and business model creation,</li> <li>• realize business opportunities and build sustainable business models,</li> <li>• evaluate chances and risks of national and international markets as well choosing among various market entry strategies,</li> <li>• incorporate stakeholder feedback into the business model.</li> </ul>					
<b>3</b>	<b>Recommended prerequisites for participation</b> Prerequisites: none Previous Knowledge: see initial skills and basics in business administration					
<b>4</b>	<b>Form of examination</b> Module exam: <ul style="list-style-type: none"> <li>• Module exam (Technical examination, Written examination, Duration: 60 Min., Default RS)</li> </ul>					
<b>5</b>	<b>Prerequisite for the award of credit points</b> Passing the Examination					
<b>6</b>	<b>Grading</b> Module exam: <ul style="list-style-type: none"> <li>• Module exam (Technical examination, Written examination, Weighting: 100 %)</li> </ul>					
<b>7</b>	<b>Usability of the module</b> B.Sc. Wirtschaftsingenieurwesen, B.Sc. Wirtschaftsinformatik					
<b>8</b>	<b>Grade bonus compliant to §25 (2)</b>

#### Courses

Course nr. 01-27-1B01-vl	Course name Introduction to Entrepreneurship	Type Lecture	SWS 3
Instructor Prof. Dr. rer. pol. Carolin Bock			

<b>Module name</b> Introduction to Innovation Management							
<b>Module nr.</b> 01-22-2B01	<b>Credit points</b> 3 CP	<b>Workload</b> 90 h	<b>Self-study</b> 60 h	<b>Module duration</b> 1 Term	<b>Module cycle</b> Every Semester		
<b>Language</b> English			<b>Module owner</b> Prof. Dr. Alexander Kock				
<b>1</b>	<b>Teaching content</b> <p>The lecture offers students an introduction to the topic of innovation management in companies. In times of disruptive and radical innovations, well-founded knowledge in innovation management is an elementary core competence of companies in order to stay competitive. After learning the conceptual basics, students learn about managing the different stages of the innovation process, from initiative to the adoption of an innovation. In addition, strategic aspects and the human side of innovation management will be introduced. The lecture thus forms an excellent thematic orientation and introduction for undergraduate students for the advanced courses of the master studies.</p>						
<b>2</b>	<b>Learning objectives</b> After the course students are able to <ul style="list-style-type: none"> <li>• give an overview of the components of the innovation process and management.</li> <li>• identify and evaluate problems that arise in the management of innovations.</li> <li>• explain, evaluate and apply theories of technology and innovation management.</li> <li>• assess the basic design factors of a firm's innovation system.</li> <li>• derive actions to improve innovation processes in companies.</li> <li>• apply the concepts to practice-relevant questions.</li> </ul>						
<b>3</b>	<b>Recommended prerequisites for participation</b> Prerequisites: none Previous Knowledge: see initial skills and basics in business administration						
<b>4</b>	<b>Form of examination</b> Module exam: <ul style="list-style-type: none"> <li>• Module exam (Technical examination, Written examination, Duration: 90 Min., Default RS)</li> </ul>						
<b>5</b>	<b>Prerequisite for the award of credit points</b> Passing the Examination						
<b>6</b>	<b>Grading</b> Module exam: <ul style="list-style-type: none"> <li>• Module exam (Technical examination, Written examination, Weighting: 100 %)</li> </ul>						
<b>7</b>	<b>Usability of the module</b> B.Sc. Wirtschaftsingenieurwesen, B.Sc. Wirtschaftsinformatik						
<b>8</b>	<b>Grade bonus compliant to §25 (2)</b>						
<b>9</b>	<b>References</b> Hauschildt, J., Salomo, S., Schultz, C., Kock, A. (2016): Innovationsmanagement, 6. Aufl. Vahlen Verlag. Tidd/Bessant (2013): Managing Innovation: Integrating Technological, Market and Organizational Change.  Further literature will be announced in the lecture.						
<b>Courses</b>							

	<b>Course nr.</b> 01-22-2B01-vl	<b>Course name</b> Introduction to Innovation Management		
	<b>Instructor</b> Prof. Dr. Alexander Kock		<b>Type</b> Lecture	<b>SWS</b> 2

<b>Module name</b> Management of value-added networks							
<b>Module nr.</b> 01-12-0B02	<b>Credit points</b> 4 CP	<b>Workload</b> 120 h	<b>Self-study</b> 75 h	<b>Module duration</b> 1 Term	<b>Module cycle</b> Every Semester		
<b>Language</b> German			<b>Module owner</b> Prof. Dr. rer. pol. Ralf Elbert				
<b>1</b>	<b>Teaching content</b> The students get an overview of the management of value-added networks. The fundamentals and theories of international management will be covered as well as strategy and strategy design (strategy design at company and business level, strategic analysis, strategic management in multinational companies). Furthermore, fundamentals of organization and organizational design (structural and procedural organization, organization of international networks) are discussed. Regarding methodological knowledge for the management of value-added networks, the fundamentals of planning and decision-making (decision theories and decision techniques) as well as an introduction to simulation modeling is provided to the students.						
<b>2</b>	<b>Learning objectives</b> After the course students are able to <ul style="list-style-type: none"> <li>• reproduce basic knowledge on the management of value-added networks</li> <li>• apply basic knowledge for the management of value-creating networks in practical situations</li> <li>• apply different decision techniques in real-world examples establish links between the basic knowledge on the management of value-added networks and further courses in business economics</li> <li>• reproduce the concepts of strategy design conveyed at different levels and to apply them in the context of practice</li> <li>• understand and reproduce different models for structural and procedural organization</li> </ul>						
<b>3</b>	<b>Recommended prerequisites for participation</b> Prerequisites: none Previous Knowledge: see initial skills						
<b>4</b>	<b>Form of examination</b> Module exam: <ul style="list-style-type: none"> <li>• Module exam (Technical examination, Written examination, Duration: 90 Min., Default RS)</li> </ul>						
<b>5</b>	<b>Prerequisite for the award of credit points</b> Passing the examination						
<b>6</b>	<b>Grading</b> Module exam: <ul style="list-style-type: none"> <li>• Module exam (Technical examination, Written examination, Weighting: 100 %)</li> </ul>						
<b>7</b>	<b>Usability of the module</b> B.Sc. Wirtschaftsingenieurwesen, B.Sc. Wirtschaftsinformatik

<b>Module nr.</b> 01-22-0M05/6	<b>Credit points</b> 6 CP	<b>Workload</b> 180 h	<b>Self-study</b> 120 h	<b>Module duration</b> 1 Term	<b>Module cycle</b> Every Semester		
<b>Language</b> English			<b>Module owner</b> Prof. Dr. Alexander Kock				
<b>1</b>	<b>Teaching content</b> The lecture Technology and Innovation Management is designed for the students to learn about the challenges of managing innovation. Organizational change and innovation are the basic requirements for competitiveness and success of businesses. However, in most industries innovation is often paired with organizational challenges and barriers. In this lecture, students get to know the fundamental concepts and design of Innovation Management and the innovation process (from initiative to implementation), as well as the interaction of central actors. Furthermore, this lecture provides insights into the specialisations Innovation Behaviour and Strategic Technology and Innovation Management.						
<b>2</b>	<b>Learning objectives</b> After the course students are able to <ul style="list-style-type: none"> <li>• identify and evaluate problems emerging from managing innovation.</li> <li>• Evaluate fundamental design factors of corporate innovation systems.</li> <li>• derive improvement procedures for innovation processes in firms.</li> <li>• apply tools of technology and innovation management.</li> <li>• make relevant recommendations for corporate practice.</li> <li>• critically and interdisciplinarily apply and transfer current knowledge of the Innovation Management field.</li> </ul>						
<b>3</b>	<b>Recommended prerequisites for participation</b> Prerequisites: none Previous Knowledge: see initial skills						
<b>4</b>	<b>Form of examination</b> Module exam: <ul style="list-style-type: none"> <li>• Module exam (Technical examination, Oral/written examination, Default RS)</li> </ul> Supplement to Assessment Methods Oral/written: Type and duration of exam are announced by the beginning of the course Written: exam (duration 60 - 90 minutes) Oral: team or individual exam (duration 15 - 20 minutes per participant)

# 6 Insight into professional life

<b>Module name</b> Excursion SAE								
<b>Module nr.</b> 18-kn-1060	<b>Credit points</b> 1 CP	<b>Workload</b> 30 h	<b>Self-study</b> 30 h	<b>Module duration</b> 1 Term	<b>Module cycle</b> Summer term			
<b>Language</b> German			<b>Module owner</b> Prof. Dr. Mario Kupnik					
<b>1</b>	<b>Teaching content</b> During the excursion SAE (duration 5 days) several companies working on electrical engineering and information technology and other fields will be visited. Students can become acquainted with close-to-reality examples. Working fields of an electrical engineer can be assessed, with technical- or organizational aspects and conditions of work as the main target. By the attendance of several companies in successive days, a comparison becomes possible. During the excursion the group is accommodated in e.g. hostels.							
<b>2</b>	<b>Learning objectives</b> Upon completion of the module, students will understand and be able to concisely describe products and production processes in micro and precision engineering of relevant industrial companies.							
<b>3</b>	<b>Recommended prerequisites for participation</b>							
<b>4</b>	<b>Form of examination</b> Module exam: <ul style="list-style-type: none"> <li>• Module exam (Study achievement, Report, p/np RS)</li> </ul>							
<b>5</b>	<b>Prerequisite for the award of credit points</b> Passing the final module examination							
<b>6</b>	<b>Grading</b> Module exam: <ul style="list-style-type: none"> <li>• Module exam (Study achievement, Report, Weighting: 100 %)</li> </ul>

<b>Language</b> German			<b>Module owner</b> Dr. Ing. Bettina Abendroth					
<b>1</b>	<b>Teaching content</b> Concepts and models of ergonomics, working systems, stress and strain, performance conditions of humans, work environment, physiological job design. Application area: design of products, working in the production and service sector.							
<b>2</b>	<b>Learning objectives</b> On successful completion of this module, students should be able to: 1. Describe the objectives and the principles of ergonomics. 2. Perform systems analysis work (on the basis of the skills of analysing, measuring, assessing, and designing human work). 3. Identify human performance requirements and classify physical and mental work and combinations thereof. 4. Explain principles of measurement for detection of environmental burdens and the impact of these burdens on people. 5. Describe methods for measuring stress and strain and their application areas. 6. Distinguish the various design fields (anthropometric, physiological, technical movement, information technology, safety technology, organisational, etc.) and apply some methods from these areas of design.

<p><b>1 Teaching content</b></p> <p>In the European Union (EU), the fundamental requirements for electrical equipment, such as safety and electromagnetic compatibility (EMC) including functionality, are stipulated in EC Directives and by national implementation in laws and decrees.</p> <p>These requirements take shape in harmonized standards. The manufacturer or his authorized agent resident in the EU or, as the case may be, the user of the equipment has to show compliance with the requirements by means of</p> <ul style="list-style-type: none"> <li>• Own tests or</li> <li>• Tests carried out by an independent neutral testing laboratory.</li> </ul> <p>During the lecture, these criteria are considered with respect to the following topics:</p> <ul style="list-style-type: none"> <li>• Product safety law (ProdSG)</li> <li>• Energy promotion law (EnWG)</li> <li>• Law on electromagnetic compatibility of equipment (EMVG)</li> <li>• Telecommunications law (TKG)</li> <li>• Explosion-protection decree</li> <li>• VDE Association for Electrical, Electronic and Information Technologies e.V. and DKE German Commission for Electrical, Electronic &amp; Information Technologies in DIN and VDE</li> <li>• Standardization: <ul style="list-style-type: none"> <li>– On national level by DIN and DKE</li> <li>– In Europe by CENELEC (= European Committee of Electrotechnical Standardization)</li> <li>– Worldwide by IEC (= International Electrotechnical Commission).</li> </ul> </li> <li>• Application of regulation on the basis of case studies: <ul style="list-style-type: none"> <li>– Case study 1: Functional Safety</li> <li>– Case Study 2: Protection against electric shock</li> <li>– Case Study 3: Information security</li> </ul> </li> </ul>									
<b>2 Learning objectives</b>	After completing the module students are aware of connections between basic requirements given by law and technical standards for research and development of electrotechnical equipment. As an outcome the participants will know the basic requirements for safety and reliability of such products.								
<b>3 Recommended prerequisites for participation</b>									
<b>4 Form of examination</b>	<p>Module exam:</p> <ul style="list-style-type: none"> <li>• Module exam (Technical examination, Oral examination, Duration: 30 Min., Default RS)</li> </ul>								
<b>5 Prerequisite for the award of credit points</b>	Passing the final module examination								
<b>6 Grading</b>	<p>Module exam:</p> <ul style="list-style-type: none"> <li>• Module exam (Technical examination, Oral examination, Weighting: 100 %)</li> </ul>								
<b>7 Usability of the module</b>	M.Sc. ESE

<b>Courses</b>		
<b>Course nr.</b> 18-gt-4010-vl	<b>Course name</b> Standardization, Testing and Approvals in the Electrotechnical Area	
<b>Instructor</b> Dr.-Ing. Stefan Heusinger	<b>Type</b> Lecture	<b>SWS</b> 2

<b>Module name</b> Patents - How to Protect Technical Inventions								
<b>Module nr.</b> 18-fi-3010	<b>Credit points</b> 3 CP	<b>Workload</b> 90 h	<b>Self-study</b> 60 h	<b>Module duration</b> 1 Term	<b>Module cycle</b> Summer term			
<b>Language</b> German			<b>Module owner</b> Prof. Dr.-Ing. Rolf Findeisen					
<b>1 Teaching content</b> Within the scope of this lecture aspects of national and international patent law as well as aspects of the law on employee will be treated as follows: <ul style="list-style-type: none"> <li>• German, European and international filing procedures and their legal prerequisites (formal and substantive patent law)</li> <li>• Enforcement of technical property rights</li> <li>• Infringement of technical property rights</li> <li>• Law on employee invention - rights and obligations of employees and employers</li> </ul>								
<b>2 Learning objectives</b> After completing the module, students will be able to deal with basic patent law issues and will have gained insight into patent law practice.								
<b>3 Recommended prerequisites for participation</b>								
<b>4 Form of examination</b> Module exam: <ul style="list-style-type: none"> <li>• Module exam (Technical examination, Oral/written examination, Duration: 90 Min., Default RS)</li> </ul> The examination takes place in form of a written exam (duration: 90 minutes). If one can estimate that less than 5 students register, the examination generally will be an oral examination (duration: 20 min.). The type of examination will be announced in the beginning of the lecture.								
<b>5 Prerequisite for the award of credit points</b> Passing the final module examination								
<b>6 Grading</b> Module exam: <ul style="list-style-type: none"> <li>• Module exam (Technical examination, Oral/written examination, Weighting: 100 %)</li> </ul>								
<b>7 Usability of the module</b> B.Sc. etit								
<b>8 Grade bonus compliant to §25 (2)</b>
