Module handbook

FB 18

Date: 03.07.2024

TECHNISCHE
UNIVERSITÄT
DARMSTADT

FB 18

This module manual lists the modules in the Studium Generale area for the following degree programs (Exam regulations 2023):

B.Sc. Electrical Engineering and Information Technology (2023)

M.Sc. Electrical Engineering and Information Technology (2023)

B.Sc. Mechatronics (2023)

M.Sc. Mechatronics (2023)

B.Sc. Information Systems Technology (2023)

M.Sc. Information Systems Technology (2023)

M.Sc. Information and Communication Engineering (2023)

B.Sc. Biomedical Engineering (2023)

Module handbook: Studium Generale (PO 2023)

Date: 03.07.2024

1	Mentoring	1
	Mentoring	1
2	Humanities and Social Sciences Modules (Offers of dep. 2 and 3)	3
2.1	Modules dep. 2 - History	3
	Optional course Modern History	3
	Optional course History of Technology	4
	Optional lecture History of Antiquity	5
	Optional lecture Medieval History	6
	Optional lecture Modern History	7
	Optional lecture History of Technology	8
2.2	Modules dep. 2 - Philosophy	9
	Ethics and Application	9
	Ethics and Technology Assessment	10
	Sustainability, Caution, Security	11
2.3	Modules dep. 2 - Political Sciences	12
2.4	Modules dep. 2 - Sociology	12
2.5	Modules dep. 2 - Linguistics and literature	12
	Digital Philology: Introduction	12
	History of Literature	13
	History of Language	14
	Lecture Digital Humanities	15
2.6	Modules dep. 3 - Teaching Export Human Sciences	16
	General Psychology I	16
	General Psychology II	17
	Analysis and Synthesis of Human Movements I	18
	Analysis and Synthesis of Human Movements II	19
	Analysis and Synthesis of Human Movements III	20
	Applied cognitive psychology	21
	Work, Organizational, and Business Psychology	22
	Ästhetik und Inszenierungspraktiken	23
	Berufsbildungstheorie und Berufsbildungsforschung	24
	Bildung für verantwortungsbewusste Digitalisierung	25
	Differential Psychology and Personal Research	26
	Einführung in die Berufspädagogik	27
	Einführung in die Biomechanik	28
	Einführung in die Pädagogik	29
	Einführung in die Sozial- und Ideengeschichte der Erziehung und Bildung	30
	Developmental Psychology	31
	Movement Science	32
	Advanced cognitive psychology	33
	Kultur- und Kunstgeschichte	34
	Educational Psychology and Instructional Psychology	35
	Soziale Ungleichheit in Bildungsinstitutionen	36
	Social Psychology	37
	Sports Medicine Anatomy	38

Sports Medicine Physiology	39
Sport Pedagogy	40
Sport Psychology	41
Sport Sociology	42
Teaching engineering subjects	43
Technikdidaktik II	44
Training Science	45
3 Entrepreneurship and Management (offers of dep. 1, a.o.)	46
3.1 EI - Lectures (basic modules)	46
Financial Accounting and Reporting	46
German and International Corporate Law	48
Basic Principles of Patent and Copyright Law	50
Introduction to project management	51
Introduction to Law	53
Introduction to Business Administration	54
Introduction to Economics (V)	56
HIGHEST lecture series - From the concept to your own company	58
Introduction to Entrepreneurship	60
Introduction to Innovation Management	62
Management of value-added networks	64
Human Resources Management	66
3.2 EI - Lectures (Continuing Modules) - only in the Master programs	68
Digital Product and Service Marketing	68
Leadership and Human Resource Management Systems	70
Master Seminar	72
Sustainable Management	73
Project Management	75
Technology and Innovation Management	77
4 Engineering and natural sciences	79
5 Languages, soft skills	80
5.1 Languages	80
5.2 Soft Skills	80
Application in Teaching (Tutor Activities)	80
6 Insight into professional life	86
Excursion SAE	86
Work and Process Organization	87
Human Factors/Ergonomics	89
Standardization, Testing and Approvals in the Electrotechnical Area	91
Patents - How to Protect Technical Inventions	93

1 Mentoring

Only in the Bachelor's degree programs

Module name Mentoring					
Module nr. 18-dy-1040	Credit points 0 CP	Workload 0 h	Self-study 0 h	Module duration 2 Term	Module cycle Winter term
Language German			Module owner		
1	Teaching content The following learning content is taught in the Mentoring: <ul style="list-style-type: none"> • reflection of own study decision and situation, • basics of the working techniques, • learning techniques and time management methods. The mentoring consists of student-led tutorials in the scope of normally twelve units consist-ing of group and one-on-one talks, as well as workshop elements and the simulation of an examination situation. For students without exam success in the first semester (WiSe) in an examination in the field of "fundamentals of electrical engineering and information technology" or "fundamentals of mathematics" of the study and examination plan, the second semester (SoSe) takes place, usually in the scope of three units consisting of one-to-one-talks and workshop elements.				
2	Learning objectives				
3	Recommended prerequisites for participation				
4	Form of examination				
5	Prerequisite for the award of credit points Passing the final module examination				
6	Grading				
7	Usability of the module				
8	Grade bonus compliant to §25 (2)				
9	References <ul style="list-style-type: none"> • Kurt Landau, Arbeitstechniken für Studierende der Ingenieurwissenschaften; Verlag ergonomia oHG, Stuttgart, ISBN 3-935089-65-1 • Kurt Landau, Besser studieren! Übungsbuch zum Werk Arbeitstechniken; Verlag er-gonomia oHG, Stuttgart, ISBN 3-935089-67-X • all required as well as current materials will be provided in the moodle course

Module name German and International Corporate Law					
Module nr. 01-42-1B01/4	Credit points 4 CP	Workload 120 h	Self-study 75 h	Module duration 1 Term	Module cycle Every Semester
Language German			Module owner Prof. Dr. jur. Janine Wendt		
1	Teaching content <p>The lecture is divided into two parts: The first part is an introduction to commercial law. The aim is to understand the importance of contract drafting in a company and to take into account the main aspects of commercial law regulations. The second part is devoted to company law, in particular the law of commercial partnerships and corporations. It also deals with the basic issues of good corporate governance and the importance of compliance. European company law will also be introduced.</p> <p>Recitation: This course discusses practical cases concerning commercial law and general company law. In preparation for the exam, sample cases will be discussed.</p>				
2	Learning objectives <p>After the course students are able to</p> <ul style="list-style-type: none"> • recognise the conditions for the application of commercial law. • distinguish between the different commercial intermediaries. • understand the basic structures of the most important forms of partnerships and corporations as legal entities for companies. • understand the importance of good corporate governance and the importance of compliance for companies. • deal with different legal texts. • understand the significance of European legal developments for German law and in particular for the protection of investors. • understand the context of legal regulations (e.g. sales law + commercial law + company law). • work on simple facts of the German commercial and company law, as well as the financial market law by applying a legal approach and to compile answers to simple legal questions independently. • generally recognise, assess and respond to the possibilities and risks of liability in legal matters. 				
3	Recommended prerequisites for participation Prerequisites: none Previous Knowledge: see initial skills and contract law				
4	Form of examination Module exam: <ul style="list-style-type: none"> • Module exam (Technical examination, Written examination, Duration: 90 Min., Default RS)

Module nr. 01-10-1028/f	Credit points 3 CP	Workload 90 h	Self-study 60 h	Module duration 1 Term	Module cycle Every Semester
Language German			Module owner Prof. Dr. rer. pol. Dirk Schiereck		
1	Teaching content This course serves as an introduction into studies of business administration for students of other sciences. The course will provide a broad spectrum of knowledge from the "birth" of business administration as an university science field until its fragmentation into many specialized disciplines. Core topics will include basics of business administration (definitions and German legal forms), some Marketing concepts, introduction into Production Management (business process optimization and quality management), basic knowledge of organisational and personnel related topics, fundamental concepts of finance and investment as well as internal and external reporting standards.				
2	Learning objectives The course encourages students who have not been confronted with business studies before to think economically. Furthermore, it should enable students to better understand actions of managers and corporations in general. After the course students are able to <ul style="list-style-type: none"> • comprehend the development in the history of business administration, • apply essential marketing concepts, • use fundamental methods in production management, • economically evaluate investment alternatives and • understand important interrelations in financial accounting. 				
3	Recommended prerequisites for participation None				
4	Form of examination Module exam: <ul style="list-style-type: none"> • Module exam (Technical examination, Examination, Duration: 90 Min., Default RS) 				
5	Prerequisite for the award of credit points Passing the examination

	Course nr. 01-60-0000-v1	Course name Introduction to Economics	
	Instructor	Type Lecture	SWS 2

Module name HIGHEST lecture series - From the concept to your own company					
Module nr. 01-27-0Z01	Credit points 2 CP	Workload 60 h	Self-study 60 h	Module duration 1 Term	Module cycle Every Semester
Language German			Module owner Prof. Dr. rer. pol. Carolin Bock		
1	<p>Teaching content The HIGHEST lecture series introduces students to the process of founding a startup. The aim of the lecture is to raise students' awareness of startup-related topics and entrepreneurial thinking. Various topics of the multi-layered start-up process are discussed and underpinned by numerous exciting examples from practice. The aim is to convey contents that are helpful for a successful founding process and enable entrepreneurial action.</p> <p>Exemplary topics are:</p> <ul style="list-style-type: none"> • writing a business plan, financing, grants and funding programs, founder skills, founder teams, • idea generation, innovations, investors, creative techniques, marketing and sales in startups, • ecosystems and networks, legal, social entrepreneurship and more. <p>Among other things, the lecture series will address these questions:</p> <ul style="list-style-type: none"> • What is innovation, and what are the paths to commercialization? • How does an innovation become a business idea and ultimately a company? • How do I know I'm a founder? • What skills and competencies does a founding team need? Who do I involve and who not? • How do I build a business? • How do I lead a team? • How do I get customers? • How do I do business with other companies? • What (legal) measures are there to protect my idea or research result? • What financing options, funding programs or support services are available? • What should I look out for when approaching financiers and Venture Capitalists? • How do I negotiate conditions skillfully? • What are positive examples, pioneers or unicorns and what can I learn from them? <p>Numerous speakers will be integrated into the lectures to share their experience and ensure a high level of practical relevance.</p>				
2	<p>Learning objectives Through the course, students are better able to assess their own abilities as founders. Students know the opportunities and challenges of the startup process. Students know the individual steps of a startup process and are supported and motivated to pursue their own startups. Students know the network and environment of the TU Darmstadt and know where they can get which support.</p>				
3	<p>Recommended prerequisites for participation The lecture series is suitable for all students (Bachelor/Master) and does not require any special knowledge.</p>				
4	<p>Form of examination Module exam:</p> <ul style="list-style-type: none"> • Module exam (Study achievement, Oral/written examination, p/np RS) <p>Supplement to Assessment Methods: Oral/written: Type and duration of exam are announced by the beginning of the course Written: exam (duration 60 - 90 minutes) Oral: team or individual exam (duration 15 - 20 minutes per participant)</p>				
5	<p>Prerequisite for the award of credit points Passing the examination</p>				
6	<p>Grading</p>

	Instructor Prof. Dr. rer. pol. Carolin Bock	Type Lecture	SWS 0

Module name Introduction to Entrepreneurship					
Module nr. 01-27-1B01	Credit points 3 CP	Workload 90 h	Self-study 45 h	Module duration 1 Term	Module cycle Every Semester
Language English			Module owner Prof. Dr. rer. pol. Carolin Bock		
1	Teaching content The course "Introduction to Entrepreneurship" (Introduction to Entrepreneurship), being part of the module "Introduction to Entrepreneurship" introduces concepts of entrepreneurship relying on basic concepts and definitions. Hereby, a global and international perspective is taken. The course includes the topics: actions of entrepreneurs, their motivations and idea generating processes, effectuation and causation, their decision-making, and entrepreneurial failure. Concerning entrepreneurial businesses, business planning, growth models, strategic alliances of young ventures, and human and social capital of entrepreneurs are discussed, Further, special types of entrepreneurship are taught. In addition, workshops will give students an insight into practical methods such as design thinking and the implementation and identification of opportunities.				
2	Learning objectives After the course students are able to <ul style="list-style-type: none"> • define and describe basic concepts towards entrepreneurship and apply it to case studies, • understand the psychologically-related concepts of being an entrepreneur, • understand and describe the evolution from small firms to multinational enterprises, • describe special types of entrepreneurship and apply it to case studies, • understand basic concepts of entrepreneurial thinking towards idea- and business model creation and apply it to science, economy, and administration, • realize business opportunities and build sustainable business models with societal relevance, • evaluate chances and risks of national and international markets as well choosing among various market entry strategies, • incorporate stakeholder feedback into the business model. 				
3	Recommended prerequisites for participation Prerequisites: none Previous Knowledge: see initial skills and basics in business administration

Courses

Course nr. 01-27-1B01-v1	Course name Introduction to Entrepreneurship		
Instructor Prof. Dr. rer. pol. Carolin Bock		Type Lecture	SWS 3

Module name Introduction to Innovation Management					
Module nr. 01-22-2B01	Credit points 3 CP	Workload 90 h	Self-study 60 h	Module duration 1 Term	Module cycle Every Semester
Language English			Module owner Prof. Dr. Alexander Kock		
1	Teaching content The lecture offers students an introduction to the topic of innovation management in companies. In times of disruptive and radical innovations, well-founded knowledge in innovation management is an elementary core competence of companies in order to stay competitive. After learning the conceptual basics, students learn about managing the different stages of the innovation process, from initiative to the adoption of an innovation. In addition, strategic aspects and the human side of innovation management will be introduced. The lecture thus forms an excellent thematic orientation and introduction for undergraduate students for the advanced courses of the master studies.				
2	Learning objectives After the course students are able to <ul style="list-style-type: none"> • give an overview of the components of the innovation process and management. • identify and evaluate problems that arise in the management of innovations. • explain, evaluate and apply theories of technology and innovation management. • assess the basic design factors of a firm's innovation system. • derive actions to improve innovation processes in companies. • apply the concepts to practice-relevant questions. 				
3	Recommended prerequisites for participation Prerequisites: none Previous Knowledge: see initial skills and basics in business administration				
4	Form of examination Module exam: <ul style="list-style-type: none"> • Module exam (Technical examination, Written examination, Duration: 90 Min., Default RS) 				
5	Prerequisite for the award of credit points Passing the Examination

1	Teaching content Students gain a comprehensive insight into the fundamentals of HR management. They learn about selected approaches to designing employee flow and reward systems and are able to classify and critically evaluate them. In addition, students gain an insight into the strategic and organizational embedding of HR management in corporate contexts. The course also looks at current challenges and innovative topics in HR management, such as digitalization and artificial intelligence. Students are also taught scientific and working methods that enable them to independently solve practical problems and tasks.				
2	Learning objectives After the courses the students are able to <ul style="list-style-type: none"> • understand and explain the basics of HR management and apply them independently on the basis of legal requirements and scientific findings. • classify and critically evaluate selected approaches to the design of employee flow systems and reward systems. • assess and communicate new challenges in HR management with regard to social and ethical responsibility in the corporate context. • classify the concepts covered with regard to their relevance in business practice and apply the specialist knowledge acquired in practice. • develop and deepen new content with the help of learned methods and working techniques and apply these in a project-oriented manner.

Module name Technology and Innovation Management					
Module nr. 01-22-0M05/6	Credit points 6 CP	Workload 180 h	Self-study 120 h	Module duration 1 Term	Module cycle Every Semester
Language English			Module owner Prof. Dr. Alexander Kock		
1	Teaching content The lecture Technology and Innovation Management is designed for the students to learn about the challenges of managing innovation. Organizational change and innovation are the basic requirements for competitiveness and success of businesses. However, in most industries innovation is often paired with organizational challenges and barriers. In this lecture, students get to know the fundamental concepts and design of Innovation Management and the innovation process (from initiative to implementation), as well as the interaction of central actors. Furthermore, this lecture provides insights into the specialisations Innovation Behaviour and Strategic Technology and Innovation Management.				
2	Learning objectives After the course students are able to <ul style="list-style-type: none"> • identify and evaluate problems emerging from managing innovation. • Evaluate fundamental design factors of corporate innovation systems. • derive improvement procedures for innovation processes in firms. • apply tools of technology and innovation management. • make relevant recommendations for corporate practice. • critically and interdisciplinarily apply and transfer current knowledge of the Innovation Management field. 				
3	Recommended prerequisites for participation Prerequisites: none Previous Knowledge: see initial skills				
4	Form of examination Module exam: <ul style="list-style-type: none"> • Module exam (Technical examination, Oral/written examination, Default RS) Supplement to Assessment Methods Oral/written: Type and duration of exam are announced by the beginning of the course Written: exam (duration 60 - 90 minutes) Oral: team or individual exam (duration 15 - 20 minutes per participant)

Course nr. 18-su-8999-tt	Course name Einsatz in der Lehre (Tutor_innentätigkeiten)		
Instructor Prof. Dr. rer. nat. Andreas Schürr		Type Tutorial	SWS 2
Course nr. 18-zh-8999-tt	Course name Einsatz in der Lehre (Tutor_innentätigkeiten)		
Instructor Prof. Dr.-Ing. Li Zhang		Type Tutorial	SWS 2
Course nr. 18-zo-8999-tt	Course name Einsatz in der Lehre (Tutor_innentätigkeiten)		
Instructor Prof. Dr.-Ing. Abdelhak Zoubir		Type Tutorial	SWS 2

6 Insight into professional life

Module name Excursion SAE					
Module nr. 18-kn-1060	Credit points 1 CP	Workload 30 h	Self-study 30 h	Module duration 1 Term	Module cycle Summer term
Language German			Module owner Prof. Dr. Mario Kupnik		
1	Teaching content During the excursion SAE (duration 5 days) several companies working on electrical engineering and information technology and other fields will be visited. Students can become acquainted with close-to-reality examples. Working fields of an electrical engineer can be assessed, with technical- or organizational aspects and conditions of work as the main target. By the attendance of several companies in successive days, a comparison becomes possible. During the excursion the group is accommodated in e.g. hostels.				
2	Learning objectives Upon completion of the module, students will understand and be able to concisely describe products and production processes in micro and precision engineering of relevant industrial companies.				
3	Recommended prerequisites for participation				
4	Form of examination Module exam: <ul style="list-style-type: none"> • Module exam (Study achievement, Report, p/np RS) 				
5	Prerequisite for the award of credit points Passing the final module examination				
6	Grading Module exam: <ul style="list-style-type: none"> • Module exam (Study achievement, Report, Weighting: 100 %) 				
7	Usability of the module B.Sc. WI-etit, B.Ed. etit				
8	Grade bonus compliant to §25 (2)				
9	References

Module name Work and Process Organization					
Module nr. 16-21-5030	Credit points 4 CP	Workload 120 h	Self-study 75 h	Module duration 1 Term	Module cycle Every 2. Semester
Language German			Module owner Dr.-Ing. Christopher Stockinger		
1	Teaching content 1. Introduction 2. Human-Technology-Organization 3. Systems Approach 4. Digitization 5. Organizational Structure and Process Organization 6. Working Time and Flexibilization 7. Teamwork 8. Diversity 9. Leadership				
2	Learning objectives On successful completion of this module, students should be able to: 1. Differentiate and compare the economic and humanitarian objectives to each other in job design. 2. Describe and assess the essential elements of job design from an ergonomic point of view. 3. Describe the MTO approach (human-technology-organization) and the systems approach. 4. Describe how the digitalization of work affects people and the organization and what implications of work design follow from this. 4. Describe the different forms of organizational structures and workflows, to present their advantages and disadvantages and to select them for a given task. 5. Distinguish and discuss working time models and flexibilization approaches as well as their effects on work design. 6. Apply design recommendations for teamwork. 7. Distinguish and discuss role and dimensions of diversity, especially with regard to teamwork. 8. Explain, assess and apply motivation and leadership models.				
3	Recommended prerequisites for participation				
4	Form of examination Module exam: • Module exam (Technical examination, Examination, Duration: 90 Min., Default RS) Written exam 90 min				
5	Prerequisite for the award of credit points Passing the examination				
6	Grading Module exam: • Module exam (Technical examination, Examination, Weighting: 100 %)				
7	Usability of the module WPB Master MPE II (Kernlehrveranstaltung aus dem Maschinenbau) Master MB II SP DbPR WPB Master PST III (Fächer aus Natur- und Ingenieurwissenschaft für Papiertechnik)				
8	Grade bonus compliant to §25 (2)

Course nr. 16-21-5030-vl	Course name Work and Process Organization		
Instructor		Type Lecture	SWS 2
Course nr. 16-21-5030-ue	Course name Work and Process Organization		
Instructor		Type Practice	SWS 1

Module name Human Factors/Ergonomics					
Module nr. 16-21-5020	Credit points 8 CP	Workload 240 h	Self-study 150 h	Module duration 1 Term	Module cycle Every 2. Semester
Language German			Module owner Dr. Ing. Bettina Abendroth		
1	Teaching content Concepts and models of ergonomics, working systems, stress and strain, performance conditions of humans, work environment, physiological job design. Application area: design of products, working in the production and service sector.				
2	Learning objectives On successful completion of this module, students should be able to: 1. Describe the objectives and the principles of ergonomics. 2. Perform systems analysis work (on the basis of the skills of analysing, measuring, assessing, and designing human work). 3. Identify human performance requirements and classify physical and mental work and combinations thereof. 4. Explain principles of measurement for detection of environmental burdens and the impact of these burdens on people. 5. Describe methods for measuring stress and strain and their application areas. 6. Distinguish the various design fields (anthropometric, physiological, technical movement, information technology, safety technology, organisational, etc.) and apply some methods from these areas of design.				
3	Recommended prerequisites for participation				
4	Form of examination Module exam: • Module exam (Technical examination, Examination, Duration: 90 Min., Default RS) Written exam 90 min				
5	Prerequisite for the award of credit points Passing the examination				
6	Grading Module exam: • Module exam (Technical examination, Examination, Weighting: 100 %)				
7	Usability of the module WPB Master MB II (Kernlehrveranstaltung aus dem Maschinenbau) Master MB II SP FAS WPB Master PST III (Fächer aus Natur- und Ingenieurwissenschaft für Papiertechnik) Studierende der Psychologie, Pädagogik und (Wirtschafts-)Ingenieurwesen				
8	Grade bonus compliant to §25 (2)

Module name Standardization, Testing and Approvals in the Electrotechnical Area					
Module nr. 18-gt-4010	Credit points 3 CP	Workload 90 h	Self-study 60 h	Module duration 1 Term	Module cycle Summer term
Language German			Module owner Prof. Dr.-Ing. Gerd Griepentrog		
1	Teaching content <p>In the European Union (EU), the fundamental requirements for electrical equipment, such as safety and electromagnetic compatibility (EMC) including functionality, are stipulated in EC Directives and by national implementation in laws and decrees.</p> <p>These requirements take shape in harmonized standards. The manufacturer or his authorized agent resident in the EU or, as the case may be, the user of the equipment has to show compliance with the requirements by means of</p> <ul style="list-style-type: none"> • Own tests or • Tests carried out by an independent neutral testing laboratory. <p>During the lecture, these criteria are considered with respect to the following topics:</p> <ul style="list-style-type: none"> • Product safety law (ProdSG) • Energy promotion law (EnWG) • Law on electromagnetic compatibility of equipment (EMVG) • Telecommunications law (TKG) • Explosion-protection decree • VDE Association for Electrical, Electronic and Information Technologies e.V. and DKE German Commission for Electrical, Electronic & Information Technologies in DIN and VDE • Standardization: <ul style="list-style-type: none"> – On national level by DIN and DKE – In Europe by CENELEC (= European Committee of Electrotechnical Standardization) – Worldwide by IEC (= International Electrotechnical Commission). • Application of regulation on the basis of case studies: <ul style="list-style-type: none"> – Case study 1: Functional Safety – Case Study 2: Protection against electric shock – Case Study 3: Information security 				
2	Learning objectives <p>After completing the module students are aware of connections between basic requirements given by law and technical standards for research and development of electrotechnical equipment. As an outcome the participants will know the basic requirements for safety and reliability of such products.</p>				
3	Recommended prerequisites for participation				
4	Form of examination Module exam: <ul style="list-style-type: none"> • Module exam (Technical examination, Oral examination, Duration: 30 Min., Default RS) 				
5	Prerequisite for the award of credit points Passing the final module examination				
6	Grading Module exam: <ul style="list-style-type: none"> • Module exam (Technical examination, Oral examination, Weighting: 100 %) 				
7	Usability of the module M.Sc. ESE				

8	Grade bonus compliant to §25 (2)

Courses			
	Course nr. 18-gt-4010-vl	Course name Standardization, Testing and Approvals in the Electrotechnical Area	
	Instructor Dr.-Ing. Stefan Heusinger	Type Lecture	SWS 2

Module name Patents - How to Protect Technical Inventions					
Module nr. 18-fi-3010	Credit points 3 CP	Workload 90 h	Self-study 60 h	Module duration 1 Term	Module cycle Summer term
Language German			Module owner Prof. Dr.-Ing. Rolf Findeisen		
1	Teaching content Within the scope of this lecture aspects of national and international patent law as well as aspects of the law on employee will be treated as follows: <ul style="list-style-type: none"> • German, European and international filing procedures and their legal prerequisites (formal and substantive patent law) • Enforcement of technical property rights • Infringement of technical property rights • Law on employee invention - rights and obligations of employees and employers 				
2	Learning objectives After completing the module, students will be able to deal with basic patent law issues and will have gained insight into patent law practice.				
3	Recommended prerequisites for participation				
4	Form of examination Module exam: <ul style="list-style-type: none"> • Module exam (Technical examination, Oral/written examination, Duration: 90 Min., Default RS) The examination takes place in form of a written exam (duration: 90 minutes). If one can estimate that less than 5 students register, the examination generally will be an oral examination (duration: 20 min.). The type of examination will be announced in the beginning of the lecture.				
5	Prerequisite for the award of credit points Passing the final module examination				
6	Grading Module exam: <ul style="list-style-type: none"> • Module exam (Technical examination, Oral/written examination, Weighting: 100 %) 				
7	Usability of the module B.Sc. etit				
8	Grade bonus compliant to §25 (2)
