

TUZ 2024

Call for Papers

Darmstadt, February 25th to 27th 2024

36. ITG / GMM / GI - Workshop on Test Methods and Reliability of Circuits and Systems

Program Committee

J. Alt
Infineon Technologies AG

H. Amrouch
TU München

B. Becker
University of Freiburg

R. Drechsler
University of Bremen and DFKI

S. Eggersglüß,
Siemens Digital Industries Software

P. Engelke
Infineon Technologies AG

G. Fey
Hamburg Univ. of Technology

A.-P. Fonseca Müller
Bosch Sensortec GmbH

M. Gössel
University of Potsdam

S. Hellebrand
Paderborn University

K. Hofmann
Technical Univ. of Darmstadt

S. Holst
Kyushu Institute of Technology

W. Hoppe
Rheinmetall AG

S. Huhn
Siemens Digital Industries Software

M. Kampmann
Siemens Digital Industries Software

R. Krenz-Baath
Hamm-Lippstadt UAS

M. Krstic
Univ. of Potsdam and IHP GmbH

V. Petrovic
Brose

L. Bolzani Poehls
RWTH Aachen

I. Polian
University of Stuttgart

F. Pöhl
Frank Poehl Consulting

S. Sattler
University Erlangen-Nürnberg

M. Sauer
Advantest Europe GmbH

M. Schillinsky
NXP Semiconductors Germany GmbH

H. Schmidt
IBM Germany GmbH

M. Schölzel
Nordhausen UAS

J. Sepulveda
Airbus Defence and Space

M. Tahoori
KIT

D. Tille
Infineon Technologies AG

M. Wahl
University of Siegen

H.-J. Wunderlich
University of Stuttgart

The Workshop on Test Methods and Reliability of Circuits and Systems is the most significant German forum to discuss trends, results and current problems in the area of test, diagnosis and reliability of digital, analog, mixed-signal and high-frequency-circuits. The exchange of ideas is an important intention of this workshop. The scope includes contributions discussing industrial practice as well as research. We strongly welcome practice-related technical reports and results as well as contributions presenting theoretical work from the following areas:

- Adaptive systems (e.g. self-repair, self-healing, self-awareness)
- Automatic test equipment, test automation, test programs and test modelling
- Defect and failure modeling
- Diagnosis of failure causes
- Fault tolerance, resilience, robust and radiation-resistant systems
- Functional safety
- Hardware-oriented test and hardware-oriented safety
- Statistical and machine learning techniques for test and reliability
- System test and reliability
- Test and simulation of mixed-signal, RF and analog circuits
- Test generation, fault simulation, self-test and online-test
- Design-For-Test, DFT methodology
- Test costs and test quality
- Test standards such as IEEE 1149.x, IEEE 1687.x, IEEE P1838

The workshop takes place at the Georg-Christoph-Lichtenberg-Haus in Darmstadt, Germany, and is organized by Technical University of Darmstadt. Interested contributors should summarize their work onto no more than 2 pages, which can be submitted via the workshop-website. The contribution should describe the purpose, the novelty and practical applications of the work. Accepted papers can be published in the informal workshop handout, if requested. For this purpose, the contribution could be extended to 4 pages.

Important Dates

20. Nov. 2023

Deadline for paper submission: ~~03. Nov. 2023~~

Notification of acceptance: 18. Dec. 2023

Camera-ready-paper: 18. Jan. 2024

General Chair

Prof. Dr.-Ing. Klaus Hofmann
TU Darmstadt
E-Mail: Klaus.Hofmann@ies.tu-darmstadt.de

Program Chair

Dr.-Ing. Sebastian Huhn
Siemens Digital Industries Software
E-Mail: Sebastian.Huhn@siemens.com

Organizer

GI FA 3.5 / GMM FA 6.5/ ITG FA 8.2 RSS Kooperationsgemeinschaft rechnergestützter Schaltungs- und Systementwurf

GMM
